Linkedin: [linkedin.com/in/jithsung](https://www.linkedin.com/in/jithsung) GitHub: github.com/jithsungh Portfolio: jithsungh.vercel.app

SUMMARY

Software engineer applying for the SDE-I role, experienced in building scalable backend services and distributed system observability.

SKILLS

Programming Languages: JavaScript, TypeScript, Go, Algorithms, Data Structures, Python, HTML, Java, SQL
Frameworks & Libraries: Node.js, React.js, Express.js, Bootstrap, CSS, Material UI, Tailwind CSS
Databases: PostgreSQL, MongoDB, ChromaDB, Firebase Firestore, MySQL, Vector Databases
Cloud & DevOps: AWS, Docker, Git, Firebase, GitHub, GitLab, Kubernetes
AI/ML: CNNs, Deep Learning, LangChain, Machine Learning, NLP, RAG Systems
Tools & Protocols: RESTful APIs, Figma, WebSockets
Other Skills: Effective Communication, Problem-Solving, Team Player

WORK EXPERIENCE

Member of Technical Staff – Site Reliability Engineer (Intern) TechMojo Solutions

- Implemented tracing using Open Telemetry for Java, Go, JavaScript and Next JS.
- Monitored system reliability, performance using observability tools, supporting incident resolution.
- Gained hands-on experience with ELK Stack, Kafka, Prometheus, Grafana alerting.

Research Internship SRM AP University, Amaravati

- Conducted research on AI Brain Tumour Detector.
- Developed and evaluated detection models.

PROJECTS

ai-interviewer [Python, TypeScript, JavaScript]

github.com/jithsungh/ai-interviewer

- Executes candidate submissions securely within dockerized, isolated sandbox environments.
- Utilizes Qdrant vector search and LLM integration to power adaptive question generation.
- Integrates advisory proctoring event logging and mandates human-in-the-loop review.

Adaptive knowledge Chatbot – RAG [FastAPI, React, PostgreSQL, ChromaDB]

github.com/jithsungh/chatbot

- Engineered a hybrid routing system that combines semantic embeddings with keyword-based matching.
- Implemented semantic question deduplication and reduced redundant queries by generating summaries.
- Implemented a Retrieval-Augmented Generation pipeline using ChromaDB to index and retrieve context.

Newzzy – Personalized News Feed [MERN stack, Tailwind CSS, DaisyUI]

github.com/jithsungh/Newzzy

- Developed a feature-rich news aggregation and AI-powered recommendation platform with JWT authentication.
- Implemented real-time news curation by integrating the NewsData.io API and keyword extraction.
- Designed a decoupled architecture by deploying a React frontend on Vercel and Express servers.

EDUCATION

SRM AP University, Amaravati	B.Tech in Computer Science	CGPA: 9.18
Narayana Junior College, Vijayawada	Class XII (BIEAP)	Percentage: 91.80%
CSKGTS, Vijayawada	Class X (BSEAP)	Percentage: 99.83%

AWARDS & CERTIFICATIONS

MongoDB Certified Associate Developer – Global Certification – MongoDB [\[bit.ly/4nRHJ76\]](https://bit.ly/4nRHJ76)

AWS Fundamentals – Coursera [\[bit.ly/3GQ9hJr\]](https://bit.ly/3GQ9hJr)

Fundamentals of UI/UX Design – Coursera [\[bit.ly/4nSiW2R\]](https://bit.ly/4nSiW2R)

University-Level Club Lead – Professional Societies Club – SRM AP
