SUMMARY

Software Engineer experienced in building fullstack web systems with TypeScript, React, Node.js, and PostgreSQL.

SKILLS

Programming Languages:	TypeScript, JavaScript, Algorithms, Data Structures, Go, HTML, Java, Python, SQL
Frameworks & Libraries:	React.js, Node.js, Express.js, Bootstrap, CSS, Material UI, Tailwind CSS
Databases:	PostgreSQL, ChromaDB, Firebase Firestore, MongoDB, MySQL, Vector Databases
Cloud & DevOps:	Git, AWS, Docker, Firebase, GitHub, GitLab, Kubernetes
AI/ML:	CNNs, Deep Learning, LangChain, Machine Learning, NLP, RAG Systems
Tools & Protocols:	Figma, RESTful APIs, WebSockets
Other Skills:	Effective Communication, Problem-Solving, Team Player

WORK EXPERIENCE

Member of Technical Staff – Site Reliability Engineer (Intern)	TechMojo Solutions
- Implemented tracing using Open Telemetry for Java, Go, JavaScript and Next JS. - Monitored system reliability and performance using observability tools, supporting incident detection.	
Research Internship	SRM AP University, Amaravati
Conducted research on AI Brain Tumour Detector available at github.com/jithsungh/AI_Brain_Tumour_Detector.	

PROJECTS

ai-interviewer github.com/jithsungh/ai-interviewer	[TypeScript, JavaScript, Python]
- Implements strict multi-tenant isolation to secure data access and manage tenant-scoped knowledge bases. - Executes candidate submissions securely within dockerized, isolated sandbox environments.	
Adaptive knowledge Chatbot – RAG github.com/jithsungh/chatbot	[React, PostgreSQL, FastAPI]
- Engineered a hybrid routing system combining semantic embeddings with keyword matching. - Implemented a Retrieval-Augmented Generation pipeline using ChromaDB to index documents.	
Court Case Management github.com/jithsungh/Court_Case_Management	[TypeScript, JavaScript]
- Implements role-based workflows and dedicated views specifically tailored for legal professionals. - Utilizes a modern frontend stack featuring React, TypeScript, and Tailwind CSS.	
AI Health Assistant – Generative AI Symptom Analyzer github.com/jithsungh/ai-health-assistant	[React, Node.js]
- Built an AI-powered app to analyze symptoms via text or PDF and recommend nearby hospitals. - Integrates the Google Maps API to perform reverse geocoding and discover specialized hospitals.	

EDUCATION

SRM AP University, Amaravati	B.Tech in Computer Science	CGPA: 9.18
Narayana Junior College, Vijayawada	Class XII (BIEAP)	Percentage: 91.80%
CSKGTS, Vijayawada	Class X (BSEAP)	Percentage: 99.83%

AWARDS & CERTIFICATIONS

MongoDB Certified Associate Developer – Global Certification – MongoDB	[bit.ly/4nRHJ76]
AWS Fundamentals – Coursera	[bit.ly/3GQ9hJr]
Fundamentals of UI/UX Design – Coursera	[bit.ly/4nSiW2R]
University-Level Club Lead – Professional Societies Club – SRM AP
