LinkedIn: [linkedin.com/in/jithsungh](https://www.linkedin.com/in/jithsungh) GitHub: github.com/jithsungh Portfolio: jithsungh.vercel.app

SUMMARY

Software Development Engineer utilizing TypeScript, Node.js, and PostgreSQL to build scalable backend systems. Experienced in cloud deployments and distributed architectures.

SKILLS

Programming Languages: JavaScript, TypeScript, Go, Data Structures, Algorithms, HTML, Java, Python, SQL
Frameworks & Libraries: Node.js, React.js, Bootstrap, CSS, Express.js, Material UI, Tailwind CSS
Databases: PostgreSQL, MongoDB, ChromaDB, Firebase Firestore, MySQL, Vector Databases
Cloud & DevOps: AWS, Docker, Firebase, Git, GitHub, GitLab, Kubernetes
AI/ML: CNNs, Deep Learning, LangChain, Machine Learning, NLP, RAG Systems
Tools & Protocols: Figma, RESTful APIs, WebSockets
Other Skills: Effective Communication, Problem-Solving, Team Player

WORK EXPERIENCE

Member of Technical Staff – Site Reliability Engineer (Intern) TechMojo Solutions

- Implemented tracing using Open Telemetry for Java, Go, JavaScript and Next JS.
- Monitored system reliability and performance using observability tools, supporting incident resolution.

Research Internship SRM AP University, Amaravati

- Conducted research on AI Brain Tumour Detector (github.com/jithsungh/AI_Brain_Tumour_Detector).

PROJECTS

AI Health Assistant – Generative AI Symptom Analyzer [Node.js, React]
github.com/jithsungh/ai-health-assistant

- Built an AI-powered app to analyze symptoms via text or PDF and recommend nearby specialized hospitals.
- Integrated Gemini API, Google Maps API, and built modular REST APIs with responsive multi-step UI.
- Supports document processing by utilizing Multer and pdf-parse to extract and analyze symptoms.

Newzzy – Personalized News Feed [MERN stack, Tailwind CSS, DaisyUI]
github.com/jithsungh/Newzzy

- Developed a feature-rich news aggregation and AI-powered recommendation platform with JWT authentication.
- Implemented real-time news curation by integrating the NewsData.io API and keyword extraction algorithms.
- Designed a decoupled architecture by deploying a React frontend on Vercel and Express/Node.js on Render.

Adaptive knowledge Chatbot – RAG [PostgreSQL]
github.com/jithsungh/chatbot

- Engineered a hybrid routing system that combines semantic embeddings with keyword-based matching.
- Implemented a Retrieval-Augmented Generation pipeline using ChromaDB to index and retrieve context.
- Designed a secure conversation manager that supports up to 25 turns of multi-turn conversation.

log-generator [Go]
github.com/jithsungh/log-generator

- Sustains generation rates of 500,000 to over 1,000,000 logs per second on modern hardware.
- Features a highly concurrent design that distributes loads across custom worker pools.
- Optimizes output performance using precomputed payloads and a 256KB write buffer.

EDUCATION

SRM AP University, Amaravati	B.Tech in Computer Science	CGPA: 9.18
Narayana Junior College, Vijayawada	Class XII (BIEAP)	Percentage: 91.80%
CSKGTS, Vijayawada	Class X (BSEAP)	Percentage: 99.83%

AWARDS & CERTIFICATIONS

MongoDB Certified Associate Developer – Global Certification – MongoDB [\[bit.ly/4nRHJ76\]](https://bit.ly/4nRHJ76)
AWS Fundamentals – Coursera [\[bit.ly/3GQ9hJr\]](https://bit.ly/3GQ9hJr)
Fundamentals of UI/UX Design – Coursera [\[bit.ly/4nSiW2R\]](https://bit.ly/4nSiW2R)
University-Level Club Lead – Professional Societies Club – SRM AP
